

LAF HEALTH CERTIFICATE FOR EXPORT OF RESEARCH RODENTS TO KOREA

I IDENTIFICATION OF THE ANIMALS

Identification	Species	Number	Sex	Age	Color	Strain

Total number of animals: _____

II ORIGIN OF THE ANIMALS

a. Name and address of the consignor:

b. Scheduled date of shipment and port of embarkation (if known):

III DESTINATION OF THE ANIMALS

a. Name and address of the consignee:

b. Scheduled date and port of arrival (if known):

CERTIFICATION STATEMENTS

I, Dawn Ngai, the Attending Veterinarian at the Laboratory Animal Facility, Hong Kong University of Science and Technology (CWB) certify animals for export, hereby declare that:

- A. The animals are Specific Pathogen Free.
- B. The animals are for laboratory use only; and
- C. The animals are healthy and are not a concern for spreading communicable animal diseases.
- D. The products were manufactured, processed, and handled in such a manner as to prevent the transmission of communicable disease pathogens.
- E. The products were manufactured, processed, and handled in such a manner as to prevent cross-contamination of BSE-related materials
- F. The animals are overseen by the Attending Veterinarian on a routine basis to ensure the wellbeing, feeding, hygiene, general husbandry and animal welfare are appropriate.
- G. A regular health monitoring and surveillance program is carried quarterly.
- H. LAF prevents the intrusion of wild rodents and other unwanted animals.
- I. The animals were born in this institution and have been permanently kept in captivity in this establishment.
- J. The animals do not come from, or have been in contact with, other animals either from a region or holding, where animals showed any clinical signs or suspicion of being infected with myxomatosis, tularaemia, rabbit haemorrhagic disease or other infectious and contagious diseases, including rabies, to which the species is susceptible to within the last 6 months, or from a facility which has been under quarantine or any other restrictive measures for animal health reasons.
- K. These mice are intended for laboratory use only and are specific-pathogen-free.
- L. The mice are of no commercial value and are non-infectious to humans or other animals.
- M. The mice have been examined on this date by the Attending Veterinarian as dated on this document and have been deemed free of any clinical signs associated with infectious diseases, including external parasites.
